Lumenis
Energy to Healthcare

A new era of personalization

We believe that being different is a good thing, especially when it comes to our bodies.

We all have different body sizes, shapes, weights and goals.

NuEraTight™ has the power to celebrate our differences and unleash your body true potential, from head to toe.

Why NuEra?

- **Smoother skin, head to toe**
a non-invasive way to smoothen and uplift your skin, with natural-looking results
- **Comfortable and relaxing**
a warm, pleasant and soothing sensation
- **Accurate and safe**
APIC technology ensures uniform heat with total safety across the treatment area
- **Powerful**
250W powerful RF waves emitted at 470kHz for highly effective treatment
- **Continued results**
book a NuEra treatment package for a smooth and firm appearance that lasts

Become the best version of YOU

Unlike the invasiveness of surgery and the harshness of chemicals, NuEraTight state-of-the-art personalized deep heating technology smartly adapts to YOUR body and naturally helps you get the total body uplift you desire. All in one tailored-made, accurate and comfortable, non-invasive treatment - delivering natural looking, long-lasting results with 'hot stone massage' feel.

Is it right for me?

Lumenis® energy-based treatments are suitable for most people and it is quite normal to experience some temporary slight swelling and redness afterwards. There is no downtime and you can resume normal activities right away.

Treatment is not suitable if you are pregnant, have active infections or are heat sensitive; any cuts, piercings or tattoos must be avoided during treatment. Always consult your treatment provider first, especially if you have a metal implant, such as a pacemaker, or have recently had injectable fillers.

How does it work?

NuEra technology

Problems such as cellulite and loose skin can occur on the abdomen, flanks, buttocks, inner and outer thighs, upper arms, bra and back fat, and around the eyes, mouth, cheeks and neck. NuEra is a non-invasive solution that treats all these areas successfully for firmer and smoother-looking skin.

NuEra emits 250W RF (radiofrequency) waves at 470kHz to gently heat skin so that collagen contracts and new collagen is produced to temporarily improve the appearance of cellulite and skin laxity. This powerful frequency is widely used by practitioners and physiotherapists for medical conditions such as muscle spasms and poor circulation.

NuEra uses APIC - next generation personalized deep heating technology, so that the RF waves can heat the skin's surface superficially or reach deeper tissue levels for the most effective results.

Treatment is extremely comfortable, safe and quick, with some patients noticing improvement after just one treatment.

MY BODY. MY RULES.
